

Risk Management Framework – Subject Matter Expert

Axellio (www.Axellio.com), an innovator in advanced edge computing products and technology, tools, solutions, and services for cyber threat hunting located in Colorado Springs, Colorado, is searching for an experienced **RMF - SME**. This is an excellent opportunity to leverage your creativity and expertise to help us build revolutionary products while working alongside industry recognized engineers and business leaders. The perfect candidate will possess all the qualifications below and be able to think critically and make decisions in a fast-paced environment and have a “get it done” attitude - and be ready to make an impact with tomorrow’s technology!

Summary:

As a Professional Services Risk Management Framework Subject Matter Expert, you will be responsible for working with Axellio’s existing Government Customers to continuously ensure the contracted systems achieve and maintain their Authority to Operate (ATO) and providing technical assistance with presales, implementations and customer technical support for issues related to hardware and software for the Axellio PacketXpress solution.

You will work with sales, services, engineering, and other cross functional teams in obtaining and maintaining ATOs for Axellio provided solutions. You will be expected to understand how our products work, how they are integrated into customer platforms, and how the RMF process will work for each system. You will be expected to work with the Cyber Risk Teams in the Government to fully understand what needs to be done to meet their needs. Thus, may include working with them to understand our system so that they apply the proper RMF standards.

Responsibilities:

- Plan and help develop LOEs for obtaining initial ATO and the maintenance of the ATO.
- Understand our solutions in enough detail to provide all artifacts needed for RMF and to aid in training the customer on the solutions.
- Assist sales teams with technical demonstrations, and answer technical questions related to RMF.
- Create knowledgebase articles, as well as basic tracking within NetSuite.
- Handle escalations from customers, DOD and Commercial related to RMF.
- As a 24X7X365 organization, shift work, night shifts, holidays and on-call responsibilities may be required as well as occasional travel to customer sites.

Requirements:

- A bachelor’s degree in engineering or computer science and 5+ Years of RMF experience in the Government for IT and Networking Systems with 2+ years’ experience in Risk Management Framework.
- Knowledge of networking and server/storage infrastructure including virtualization technologies (Openshift and VMware), Operating Systems (Linux and related) and cybersecurity tools (i.e., Security Onion, Splunk, Zeek, Snort, Suricata).
- Experience with APMS, eMASS, STIG and SCAP, NESSUS and other vulnerability scanning software.
- Experience with A&A (Assessment and Authorization), including ISSO, ISSM and writing, tracking, and resolving POAMs.
- Preferred experience with remediating identified Information Assurance Vulnerability Alerts (IAVAs) within DoD systems.
- Secret or higher security clearance required.

What you get:

- The chance to develop next generation products and work with others who are passionate about technology.
- Excellent pay and benefits and an opportunity to create something special and share in that success.
- A team driven by collaboration and getting results in a fast paced and transparent start-up environment where trying new things, “failing fast”, and learning are valued.
